## Miscellaneous papers (Box #12) 6

---

Many of the following speeches (MSCP 36 - MSCP 70), which were grouped under the general subject heading of poverty, pertain to the discussion during the third council session (1964) of schema 13 of the Constitution of the Church in the Modern World (See Box #6). The following documents are all in Latin, typewritten l.ltr. Several of them bear a faint trace of a handwritten date; but because it was difficult to decipher, the date is not recorded as part of the finding list. When it was possible to verify the date according the council Daybook, the date and reference are cited in a note at the end of the entry. The title given for the speech corresponds exactly to the heading at the beginning of the typescript. The 'time' entry presumably records the time the speech was delivered, while the 'pages' entry apparently indicates its place in the larger collection of speeches made on a given day. Nevertheless, the lack of verifiable dates made it impossible to arrange the speeches in chronological order, so its was decided to catalog the speeches alphabetically according to last name of the presenter.
